

North West Cardiff Group have organised a petition asking the the LDP to be amended to delay development in North West Cardiff so that housing and transport aligns with the Metro and proper consideration can be given to Cardiff Civic Society's plan for new, sustainable communities.

Cardiff's Local Development Plan wastes a once-in-a-lifetime opportunity to create a 21st century city with modern public transport. Instead, it is rushing ahead with more urban sprawl and no proper plan for transport and essential infrastructure. This is a disaster for new and existing residents, for our Capital City and for SE Wales.

The LDP was started before the Cardiff Capital Region was established and before the Metro was approved. The LDP must be amended to include these positive changes or it will be out of date before it is adopted.
